DNA ANALYSIS PROTOCOL FOR DETECTION OF HEREDITARY DISEASES

Submitter of analysis : Nora Lukacs
4/A str Domaszek
1173 Budapest, Hungary

Date of sampling : 30.03.2015
Date of samples receipt: 01.04.2015
Date of analysis : 08.04.2015

Breed/name	Tattoo or RFID id/ Certificate of origin	Laboratory code	Type of analysis	Result
English Cocker Spaniel/ ARMANI BIG CITY LIFE	953000010128379	150401/L0999	PRA-prcd	N/N Non-affected

The results of analysis are stored in a database under the lab code 150401/L0999.

Hints:

Genotype PRA-prcd N/N – healthy subject – non-affected

Both genes, inherited from both male and female are unaffected. That means that the subject has both alleles healthy.

Genotype PRA-prcd N/A – carrier

Subjects with confirmed heterozygous N/A genotype are carriers. Gene mutation can be transmitted to offspring.

Genotype PRA-prcd A/A – affected subject

The subject is a homozygote with A/A genotype, which inherited the affected allele from both parents and thus is affected by the disease.

Notice: This protocol applies exclusively to the sample and the data that were supplied by the submitter. DNA analysis concerns only the above mentioned disease. No information regarding the customer as well as purpose and results of the analysis will be provided to third parties.
